EDUCATION

Technische Universität Hamburg
Information and Communication Systems
Master of Science

Oct 2024 – Mar 2027
Hamburg, Germany

Indian Institute of Information Technology
Electronics and Communication Engineering
Bachelor of Technology

Aug 2019 – May 2023
Bhopal, India
GPA: 8.93/10

EXPERIENCE

Working Student - Enterprise Architect
Eppendorf SE

Nov 2024 – Present
Hamburg, Germany

- Developed and maintained a Python-based automation framework for data collection and data maintenance in SAP LeanIX through standardized REST APIs and GraphQL integrations.
- Engineered a Python-based parser to automate SAP LeanIX permission management, reducing manual configuration effort.
- Automated the migration of GDPR processing activity records from SharePoint to LeanIX using a custom Python script, improving data consolidation and compliance tracking.
- Built an AI-powered internal knowledge assistant using Langdock, LeanIX MCP server, and enterprise documentation, reducing time spent searching for application information.

Full Stack Developer (Consultant)
AST LLC

Jul 2023 – Sep 2024
Remote

- Maintained and developed the TaaS team's web portal using Spring Boot and React.
- Led the frontend upgrade for the web portal, updating legacy codebase to use modern React 18+ features such as Functional Components, Hooks etc.
- Automated complex project onboarding process by developing a web-based wizard, saving hundreds of manual hours.
- Introduced functionality to publish and lock a Test Run in real-time from the web portal, which is now utilized by over 29 team members, significantly reducing the time and efforts of the support team.

Full Stack Developer
D-WebBox

Jan 2023 – Jul 2023
Mumbai, India

- Led the frontend for the FOR ALL COMMUNITY application for Great Place To Work®, built entirely from scratch for Android and iOS platforms.
- Designed and developed entire backend system for Prelux Asian Paints from scratch, a feature complete dashboard system for management of contractor meets and events.
- Implemented complex peer scoring mechanism logic at scale for GenWE application.
- Performed code reviews and enhanced the performance of several React Native applications.

React Native Intern
D-WebBox

Jun 2022 – Jan 2023
Remote

- Enhanced iOS specific features and UX of FIKAA, an application built for investing in the stock market.
- Built the Amyraa cross-platform e-commerce application for Android and iOS using React Native.
- Improved iOS features and resolved launch-critical issues across production React Native applications.

Frontend Development Intern
TravOkarma

Oct 2021 – Jun 2022
Remote

- Improved the performance of the User and Creator dashboard section by optimising Network calls and refactoring UI code.
- Designed and developed several features such as Profile and Blogs section on the app from scratch.

Software Development Intern
Remassis

Oct 2020 – Oct 2021
Remote

- Developed a cross-platform iOS/Android Online Consultation App in React Native
- Developed and maintained back-end systems and microservices in Express/Node.js, GraphQL and MySQL.
- Implemented real-time features of the app such as video call using WebRTC, Notification system using FCM.

OPEN SOURCE

Ancient Beast: Open-source turn-based strategy game built with TypeScript.

- Implemented core gameplay features and resolved multiple functional bugs.
- Implemented UI enhancements and resolved visual defects using Less/CSS.

Twenty CRM: Open-source CRM platform built with NestJS, React, and TypeScript.

- Developed frontend enhancements to improve usability and overall user experience.
- Implemented support for composite fields in the Excel Import Wizard , improving data import capabilities.

PROJECTS

Code Churn in Vulnerability and Bug Commits: An Empirical Analysis (*Projektarbeit, Institute of Software Security, TUHH*): Built a custom code churn extraction pipeline to analyze 126,000+ security and bug-fix commits across Java and C/C++ projects using four curated datasets.

School ERP for JMRD, Datia: Designed and built a full-stack School ERP system with attendance, administration, notice board, and doubt management features using React Native, Node.js, and MongoDB.

MovieFinder: iOS app built in Swift and SwiftUI that retrieves movie information from the OMDb API and features an offline watchlist using CoreData.

GuessTheFlag: A fun flag guessing game, built from scratch using Swift and SwiftUI for iOS platform.

Personal website: Showcases projects, technical blogs, open-source contributions, and resume, built with Jekyll and hosted on GitHub Pages.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, Swift, HTML/CSS

Frameworks: Spring Boot, React, React Native, Node.js, Express.js, Flask, SwiftUI

Databases & APIs: MySQL, MongoDB, REST APIs, GraphQL

Cloud & Enterprise: AWS, Docker, LeanIX, SAP

Developer Tools: Git, GitHub Actions, VS Code, Eclipse, Xcode, Vim, L^AT_EX

ACHIEVEMENTS/AWARDS

MMVY Scholarship: Received full tuition fee from MP state Government for the entire bachelors course

BN Yadav Memorial Award for School Topper: For highest marks achieved in school

IEEE Hacksagon: Finalist at Hacksagon conducted by IEEE at IIIT Gwalior

Enthu of the Year at D-WebBox: Always in high-spirits and excited about the tasks at hand

Rising Star Award at AST LLC: Awarded for valuable contributions to Automation Cloud Tester (ACT) Web Portal and Support Tools development

LANGUAGES

German: Goethe-Zertifikat A2 (Sehr Gut); B1 completed, B2 in progress at TUHH

English: IELTS 8.5/9 (CEFR C2)

Hindi: Native
